

APPLIED MULCHES AND MULCHING

"Very smoothly, considering that it's been twenty years." Bernard permitted a faint smile. "Jean's finding some things a bit strange, but I'm sure she'll get over it." Doom. I remember some places, but I was too little to have memories of them all. A few months here, a. Besides, if Sinsemilla flipped out when she woke up and found herself in a hospital, her performance. THE TENSION THAT had been increasing since planetfall and the shock of the most recent news were showing on Wellesley's face when he rose to address a stunned meeting of the Mayflower II's Congress later that morning. And as he seemed a shell of the man he had been, the assembly facing him was a skeleton of the body that had sat on the day when the proud ship settled into orbit at the end of its epic voyage. Some, such as Marcia Quarrey, had vanished without warning during the preceding weeks as Chiron's all pervasive influence continued to take its toll; a few down on the surface had been unable to return in time for the emergency session. Nevertheless, at short notice Wellesley had managed to scrape together a quorum. He told them of his intention; a few voices of protest and dissent had been heard; and now the legislators waited to hear the decision that to most of them was already a foregone conclusion. "Spike it with what, dear?" .not merely a passing madness or an enduring insanity, but also passion. If looniness could be converted. The apparition in the dark yard next door stopped squealing, but in a silence as disconcerting as the cries. The major's jaw quivered; his face colored. He could see the throat muscles of the troopers in the background tighten with frustration, but there was nothing for it. He had his orders. "On your way," he growled. "And don't think you've been so lucky," he warned as the Chironian walked away. "We've got your face taped. There'll be a next time." Leave the house. Sleep in the yard. Let Dr. Doom deal with the mess if there is one. Juanita saw the expressions on Bernard's and lay's faces. "Are you claiming that we're any more violent or barbaric than your societies? We've never had a war. We've never dropped bombs on-houses full of people who had nothing to do with the argument. We've never burned, maimed, blinded, and blown arms and legs off of people who just wanted to live their lives and who never harmed anybody. We've never shot anyone who didn't ask for it. Can you say the same? Okay, so the system's not perfect. Is yours?" .simmering bitterness to which the coffee was a perfect accompaniment. "Sentry detail, detach to . . . post!" Sirocco shouted. PFC Driscoll stepped one pace backward from the end of the by-this-time-diminished file, turned ninety degrees to the right, and stepped back again to come to attention with his back to the wall by the entrance to a smaller side corridor. "Parade . . . rest!" Driscoll moved his left foot into an astride stance and brought his gun down from the shoulder to rest with its butt on the floor, one inch from. "Maybe. Who knows? Let's just hope there aren't too many of them in the Army." Colman exhaled a long breath. He could see now why Celia had been scared, and why Stern had kept her under constant watch. No doubt until he had attended to the more pressing aspects of the unexpected opportunity that had presented itself. level then, but I understood the implications, anyway. It was an amazing wedding, let me tell you, though. As Geneva rose from the table, Micky said, "Aunt Gen, sit down. This isn't about pie." "That's true," Bernard agreed. "But the risk of Stern trying anything with those weapons has to be greater if he thinks he can blackmail a defenseless planet, If he knew what he was up against-you don't have to give him every detail-it might be enough to persuade him to give it up. That's all we're asking. For the sake of those people up there, you owe it to spell out a warning, clearly and unambiguously." .resisted him." .providing us with all we need and for giving us the grace to be satisfied with what we have." .he feels his way with outstretched hands to guard against surprises." "That's right-Michigan. I think I was something of a not-very-welcome accident. My mother liked the fun life-lots of boyfriends, and staying out all night and stuff. I guess I was in the way a lot of the time." In the hallway, he encountered a nurse pushing a stainless-steel serving cart: a petite raven-haired. "Oh, trouble now, trouble with a capital S-n-a-k-e. Thingy's pissed, hidin' under the highboy, him bruised." "I think so. I can find it anyway." "We don't have cats." Leilani blinked. "Oh." She grinned. "Good one." She hooked her right hand into an. They stood but three feet apart, face-to-face, and in spite of Micky's compassionate intentions, a. abandoned houses, in castles inhabited by people with surnames of Germanic or Slavic origin, in funeral. The motor home is rolling along at the speed limit or faster, and he assumes that the owners?the man. The FBI, the National Security Agency, and other legitimate authorities won't kill Curtis immediately. "Oh, God . ." Jean whispered. "They're going to bring out those bombs." .to Sundaes on Wednesdays." "You turning yourself loose?" Rickster asked. "Yeah. Yeah, I'm leaving." "When did I say that?" Leilani asked disingenuously. Colman nodded. "Gone to the storeroom with Hanlon and Lechat. Everything was quiet upstairs when we left." He's wearing a headset with an extension arm that puts the penny-size microphone two inches in front of. "Baby, baby," Sinsemilla said, "look at this, look, look. Baby, look, see, look." She extended her hand, above her, in the open doorway, and even in this poor light, Leilani could see that they both still looked. guard, as well. "She's a good-looking girl. What does she do?". There were no more major points to discuss. The timetable was confirmed, and Stormbel entered a codeword into a terminal to advance the status of the provisional orders already being held in a high-security computer inside the Communications Center, on a lower level of the Columbia District module. Sirocco shrugged. "I'm pretty sure it can't be Wellesley. He's tried to play it straight, it's all sweeping him way out of his depth. Anyhow, what would he have to gain? All he wants to do is to be put out to pasture; he's only got a few days left. Ramisson obviously wouldn't be involved in something like that, and the same goes for Lechat. But as for the rest, if you ask me, they're all crazy. It could be any of them or all of them. But that's who the Chironians are really after." .when they retired for the night. Raising his face out of its concave image, snorting sand out of his nostrils, blowing a silicate frosting off. steel and railroad ties, automobile transports, slat-sided trailers carrying livestock, tankers full of gasoline, "Even you?" "You mean when the Chinese and the Europeans get here?" .Suspecting that Rickster might be a little afraid of the night,

Noah said, "Do you want me to take her." "This looks like what we want, chief," Stanislaw said to Sirocco, and pointed to one of the entries. Sirocco leaned closer to peer at the screen. STEVE. "Bonus points," said Leilani. "Your dad must be great." Colman came out of the Omar Bradley Block and began walking quickly toward the main gate. Vehicles were landing and taking off continually in the depot area while ammunition boxes were hastily unloaded from ground trucks; the barracks area seemed to be alive with squads doubling this way and that, and officers shouting orders. Sandbagged weapons pits that hadn't existed hours earlier had appeared at strategic places, and new ones were still being dug. "we'll get there while the action is still hot. The only reason we're renting next door for a week is because. Lechat shook his head. "It wasn't necessary. In a few more days Ramisson would have been elected, almost certainly. Then everything would have worked itself out smoothly and tidily. This action complicates everything again. Wellesley is probably declaring an emergency right now, in which case the election will automatically be suspended. It puts everything back weeks, maybe months." "I thought it would be at least one ninety," Micky replied. "Jay told us you're an engineering officer on the Mayflower 11," Chang said, sounding interested. "A specialist in fusion processes." "of respectable magnitude." "Yes, I was about to come to that," Sirocco replied. He lifted his head a fraction to address the whole room again. "As Velarini says, they could come in through the Battle Module and the nose. The Battle Module is the main problem. It's bound to be the most strongly defended section anywhere, and there's only one way through to it from the rest of the ship. Therefore we assault it directly only if all else fails. We've put Steve up near the nose of the Spindle with the strongest section to block that access route. Steve's. fantastic and unlikely, might be waiting for you in a closet. exception, and by gratitude that the worst of his own imperfections were within his ability to make right if. Sitting on the edge of the bed once more, Curtis extracts the wadded currency from the pockets of his. The sky outside was sunny and blue with a few scattered clouds, and a pleasantly warm breeze carried the scents of rural freshness from the hills rising to the south. Fallows still wasn't fully accustomed to the notion that it was all real and not just a simulation projected from the roof of the Grand Canyon module, or that the low roars intermittently coming in through the opened window of the living room downstairs were from shuttles ferrying up and down to what was now another realm. He allowed his mind to distract itself with the final chores of moving while it completed its process of readjustment. a high cliff of emotion so steep that it scared her, and a sea of long-forbidden sentiments breaking below. have initiated hostilities. And the two men wouldn't resort to violence so immediately if they weren't. This scheme at last explained a number of things which previously had been noted merely as empirically observed curious coincidences. It explained why quarks came in three colors: Each one-plus-two combination of dums and dees. smells threatening or at least suspicious. "I never said anything of the kind. The whole point is that they are no~ indiscriminate. That's precisely what a lot of people around here won't get into their heads, and why they have nothing to be afraid of. The Chironians don't draw a line around a whole group of people and think everyone inside it is the same. They haven't started hating every soldier because he happens to wear the same color coat as the bunch that's running wild down there, and they won't start hating every Terran either. They don't think that way." for the bar. into bricks of gold, old Sinsemilla would provide paving for a six-lane highway from here to Oz, but she. "The compassionate young woman who saved him from the needle," Micky pressed, "was she you, Aunt. was under surveillance. No one followed him, not even at a distance. Still wary but with growing confidence, he drops to his knees to search the closet floor for anything that. outside and turn her free?" "I suppose all this seems a bit strange to you folks," Rastus noted. "But with the machines providing everything back in the days when the Founders were growing up, the idea of restricting the supply of anything never occurred to anybody. There wasn't any reason to. We've carried on that way ever since. You'll get used to it." EVEN IN HIS short time at the university near Franklin, Jerry Pernak had learned that Chironian theoretical and experimental physics had departed significantly from the mainstream being pursued on Earth. The Chironian scientists had not so much advanced past theft terrestrial counterparts; rather, as perhaps was not surprising in view of the absence on Chiron of traditional habits of thought or. authorities whose venerable opinions could not be challenged until after they were dead, they had gone off in a totally unexpected direction. And some of the things they had stumbled across on theft way had left Pernak astounded. While staring at Sterm, Borftein tapped Judge Fulmire's personal call code with his fingertips and moved the compad quietly beneath some loose papers lying against a folder in front of him on the table. sixteen, thereby squelching any affection he might have felt toward her. Even more remarkable was another prediction that followed from the Chironian symmetry relationships, which required the creation of an "antiuniverse" along with the universe, populated by antimatter and consisting of an extraordinary realm in which "antitime" ran backward and "antispace" contracted from an initial volume of zero, Universes, like particles, were created in pairs. And it was the duality of universes, each exhibiting a spacetime decomposed into two discrete dimensions, which gave rise to the two-way duality manifested by tweedles and antitweedles: Dums, dees, antidums, and antidees were simply spacelike, timelike, antispacelike, and antitimelike projections of the same fundamental entity existing in the timeless, spaceless domain of tweedlespace. he was a brave boy; but no brave boy surrenders this easily to his misery. all the hateful words and throw a few punches instead. Colman was listening grimly. "What about his wife?" he muttered to Sirocco. great resources and urgency across the West. He's probably returning from a late dinner, with a thermos. The SD corporal at the rear-lobby security point was surprised when a captain of one of the regular units arrived with the relief detail and requested the duty log. "I didn't know they were posting regulars in here," the corporal said, sounding more puzzled than suspicious. the full beautiful spectrum of her radiance. Sometimes Leilani thought this might indeed be the reason that. "Where do you get this stuff?" Chapter 14. The brow of the cab gleams as white as skull bone. One loose corner of black canvas flaps like the. now or whether they'd remember Luki? or admit to remembering him." As the snake slithered along the wall and under the tall chest of drawers, Sinsemilla bounced

on the bed: As a temporary barracks for the military force based on the surface, the Chironians had made available a recently completed complex of buildings designed as a school, which was intended for occupation later as Canaveral City expanded. It comprised a main administrative and social block, which the Army was using mainly for administrative and social purposes; an assortment of teaching and residential blocks, most of which were being used for billeting the troops, with part of one serving as a Detention Wing; a gymnasium and sports center which had become the stores, armory, and motor pool; and a communal dining hall which was left unaltered. Pernak knotted his brow, pursed his lips, then stretched them back to reveal his teeth. "Then those people should look after their own future instead of waiting for someone else to work it out for them. That's the old way. They have to learn to think the Chironian way." After a second of hesitation he added, "that's what Eve and I are going to do. In the gloom, the boy loses track of the money. He's focused intently on the cowboy boots...astute. Lechat told Fulmire that he no longer thought it advisable to attempt setting up a Terran community alongside the totally unfamiliar experience of Franklin--at least, not immediately, The Terrans would need time to readjust, and in the meantime they would cling to their Own familiar ways and customs. The proximity of Franklin would only cause tensions. Lechat believed, therefore, that the migration to the surface should be halted completely, the existing plans abandoned, and a new Terran settlement established elsewhere for the transition period. An area called Iberia, on the south coast of western Selene, would be a suitable place, he thought. Lechat didn't know what would happen after that and doubted very much if anything could be predicted with confidence, but for the nearer term it would be the answer both to giving the general population a chance to settle in without disruptive influences, and the extremists an opportunity to cool down and do some more thinking. Soldiers were already coming round the corner and bearing down on them fast, two sergeants in the lead, when the guards turned back again. The SD's reached instinctively for their sidearms, but their holsters were empty. For three vital seconds they were too confused to go for the alarm button on the wall-panel behind them. Three seconds were all Hanlon and Colman needed to cover the remaining distance. demand. Since we are not talking about a technologically backward environment, a considerable degree of expertise in modern industrial processes would be essential to the fulfillment of that obligation, which gives us, in Engineering, an indispensable role. I trust you see my point." Stern nodded slowly as he ticked off the points one by one in his mind, looking at Stormbel coolly, then turned to Gaultitz, one of the senior scientists, who was sitting with some advisers to one side of the room. "Let us be certain about the Kuan-yin," he said. "The success of the entire operation is at stake. You are quite sure?" After a while, Leilani shifted her gaze from November in Montana and met Micky's stare. "I knew then. Leilani listened intently. The perfect tickless silence of a clock-stopped universe still filled the house. foot and tattoo a pattern of pain on his ankle? all because he doesn't always proceed exactly in the dog's. the bed and on a straight-backed chair; neither the luggage nor the furniture suggested a strategy for this. plain grub. self-loathing were the two bartenders who served her, and right now she felt freer of both than she'd. visible under the door to the right. "I'd love a piece, thanks," Leilani said. scamp, a rascally fun-loving creature that lives by the simple rules of wild things. had married the congressman five years ago, before the first of his three successful political campaigns. As the boy eases shut the door of the Explorer, the mongrel pads toward the back of the auto carrier. "It doesn't matter," Colman told him. "It's different in different places. It might be the best hunter in the village or the guy who's killed the most lions. It might be the way you paint your face. Through most of history it's been money. What you buy with it isn't important. What's important is that the things you buy say to all the other guys, 'I've got what it takes to earn what you have to, to buy all this stuff, and you haven't. Therefore I'm better than you.' That's what it's all about." "Veronica made it!" Jean exclaimed delightedly. "Steve, I don't know how you handled it all." character of all their voices suggests that the battle isn't over and perhaps isn't going to be brief be brief; "What I really need is a beer." isn't the direction that they ought to be taking. "The Giant is not slain," the tall, muscular, steely-eyed hero declared to his loyal, wavy-haired aide as they stood in front of an Air Force VTOL on a peak of the San Gabriel Hills above the Los Angeles ash-bowl. "It must sleep a while to mend its wounds now its task is done. But it will rise again, hardened and tempered from the furnace. This will not have been for naught." The figures and the mountain shrank as the view widened to include the setting sun that would see another dawn, and the music swelled to a rousing finale of brass and drums backed by what sounded like a celestial choir. "Relax." Micky switched on the light above the sink. "I can handle it." Slessor's brow furrowed more deeply, He hesitated, thought for a moment, and then nodded. "Very well, I'll see it's done." He moved away from view. A short hall, lined with imitation wood paneling, featured three doors. Two bedrooms and a closet. The painter looked dubious while he inspected the windowsill that he was to tackle next. "That doesn't make much sense," he murmured after a while. "Why would somebody stay poor if he didn't have to? That'd be a strange. kind of way to carry on." "Thanks. They must be real. Even the best implants don't look that natural. Unless there's major." He underestimated you. And I regret to admit, when I came to you, my expectations weren't terribly. Anita held on to Colman's finger, and he read her action as a silent invitation. He had slept with her a few times, many months ago now, and enjoyed it. However much he had found himself becoming aroused by her attention through the evening, the conversation about pairings and the imminence of planetfall introduced a risk of misinterpretation that hadn't applied before. Being able to look forward to making a stable and permanent domestic start on Chiron could well be what lurked at the back of Anita's mind. When he got the chance, he decided, he would have to whisper the word to Hanlon to help him out if the need arose as the evening wore on. "Not a ballerina, I assume." address is also his apartment? and the whole shebang in three rooms above a palm-reader's office. "You shouldn't stray from right here, son. There's all kinds of people in the world, and some you don't." Your last chance to reconsider," Stern said, looking back out from the screen. could have a brandy or two and not wind up, one year later, facedown in a puddle of vomit, her nasal. She turned on the shower, as well, but she didn't undress. Instead, she lowered the lid on

the toilet and
