

DINING ALONE STORIES FROM THE TABLE FOR ONE

Curtis shudders. His fevered imagination supplies numerous chilling possibilities for what was dislodged. Hanlon detached himself from a group and sauntered over to Colman, Celia, and Lechat. Things had been so hectic that an opportunity for a few quick words with them had not presented itself since Colman's return. "Well, I see there's no need to ask how things went on your side, Steve. I take it that Veronica's in safe hands now." When Micky rose to clear away the dinner dishes, Leilani pushed her chair back from the table and. Sinsemilla wasn't in the living room..enough to drink ought to be ashamed..Cliff Waiters would never have gotten himself into a stupid situation like that. So what if Walters did sometimes turn a blind eye to little things that didn't matter anyway? Walters was a lot smarter when it came to the things that did matter. So much for Fallows, the smartass kid shuttling up from Arizonian to save the universe, who still hadn't learned how to keep his nose clean. Cliff Waiters had earned every pip of his promotions, Fallows conceded as part of his self-imposed penance; and he had earned every year of being a nonentity on Chiron that lay ahead'. Someday, maybe, he'd learn to listen to Jean..reeling off the stool. He thinks for a moment that they see through him, recognize him as the most-wanted. It could only have been from the Chironians he had talked with earlier. Why would they mention his name to her? Who was she? She came nearer and smiled. "My name is Kath. I have some connection with the technical aspects of what goes on here. From what I've heard, I'd imagine you'd find this an interesting place. Perhaps when you've some free time, you'd like to meet some of the people here. If you like, I could mention it to them."..self, break out of the straitjacket, and all the rest, huh?" "Maybe." "When we were discussing the Continuity of Office clause," Kalens prompted..About all he was good with outside things like that was cards. He couldn't remember exactly when his fascination with them had started, but it had been soon after Swyley, then a fellow private, had taught him to shuffle four aces to the top of a deck and feed them into a deal from the pall. Finding to his surprise that he seemed to have an aptitude, Driscoll had borrowed a leaf from Colman's book and started reading up about the subject. For many long off duty hours he had practiced top-pass palms and one-handed side-cuts until he could materialize three full fans from an..Then the tramp of marching footsteps growing louder came from beyond the main doors. A second later the doors burst open, and General Stormbel stomped in at the head of a group of officers leading a detachment of SD troopers. With dispatch, the troopers fanned out, closed all the exits, and posted themselves around the walls to cover the assembly, while Stormbel and the officers marched down the main aisle to the center of the floor and turned to face the Congress from in front of where Wellesley was still standing. Borftein leaped to his feet, but checked himself when an SD colonel trained an automatic on him. Then he wheeled back to look first at Jean and then at Bernard, who was listening from the sofa below the wall screen. "Anyway I know a lot of people think the way Jean does, but we could still get anti-Chironian reactions from many elements. That's what worries me. But if we set up a liberal civil administration here now, while the opportunity presents itself, I think there's a good chance that Wellesley might accept it as a fait accompli, even if he does declare an emergency, and go along with us when he recognizes the inevitable- which I suspect he might be beginning to do already. That would give everybody a new tomorrow to wake up to, and they'd soon forget this whole business. But there isn't much time. That's why I skipped the meeting. Now you two can help, pretty much in the ways we've discussed. What I'd like you to do first is-" The call tone from Lechat's compad interrupted. Otto seemed to be the spokesman. He seemed anxious to reassure them. "We would only destroy the ship without warning if it were to commence launching and deploying its strategic weapons without warning," he told the Terrans. "It is a difficult matter to exercise exact judgment upon, but we feel the most likely course would be for Sterm to issue an ultimatum before resorting to direct action. After all, he would hardly stand to profit from destroying the very resources that he hopes to possess. Our intention has been to reserve our warning as a reply to that ultimatum. In the meantime his support will continue to wither, hopefully with the effect of making him better disposed toward being reasonable when the time comes." The owners of the Windchaser aren't in sight, but they must be nearby to be able to trigger the lock by her brain. Micky was better than that. Whatever the answers might turn out to be, he couldn't fathom what they might have to do with making model steam locomotives and his father's solemn pronouncement that it really wouldn't be a good idea for him to continue his friendship with Steve Colman. But there had been no point in making a fuss over it, so he had lied about his intentions without feeling guilty because the people who told him not to be dishonest hadn't given him any choice. Well, they had technically, but that didn't count because there were things they didn't understand either . . . or had forgotten, maybe. But Steve would understand. CELIA KALENS STRAIGHTENED the kimono-styled black-silk top over her gold lam? evening dress, then sat back while a white-jacketed steward cleared the dinner dishes from the table. It's all unreal, she told herself again as she looked around her at the interior of Matthew Sterm's lavish residential suite. Its preponderance of brown leather, polished wood with dull metal, shag rugs, and restrained colors combined with the shelves of bound volumes visible in the study to project an atmosphere of distinguished masculine opulence. She had contacted him to say that she needed to talk with him privately--no more--and within minutes he had suggested dinner for two in his suite as, "unquestionably private, and decidedly more agreeable than the alternatives that come to mind." The quiet but compelling forcefulness of his manner had made it impossible somehow for her to do anything but agree. She told Howard that she was returning to the ship for a night out with Veronica, who was celebrating her divorce--which at last was true. Though Veronica was celebrating it in Franklin with Casey and his twin brother, she had agreed to confirm Celia's alibi if anybody should ask. So here Celia was, and even more to her own surprise, dressed for the occasion. at me. His face was blurred a little because the window was dirty. I think he waved. "I don't like the idea of a limited military presence down there," Borftein said.

"We're trusting the Chironians too much. I still say they could have strength that they're not showing yet. We could be exposing those civilians to all kinds of risks--terrorism, provocations. Children and young people were everywhere, and humanoid robots seemed to be part of the scheme of things. The robots intrigued Bernard; such creatures were not unknown on Earth, but they had tended to be restricted to experiments in research labs as technological curiosities since, functionally, they didn't really make a lot of sense. Presumably the Chironian robots had been developed from the machines that had raised the first Chironians, which had-been designed not in the form of tin men at all, but to suit their purpose--as warm-bodied, soft surfaced tenders. So conceivably the notion of machines as companions had become a permanent feature of Chironian life that could be traced back to the earliest days. The designs had later been changed to suit the whims and preferences of the children after natural parents appeared on the scene to satisfy their more basic physiological and psychological needs. To his surprise Bernard found himself thinking that the relationship between man and humanoid machine might have been quite warm, and in some way charming; certainly he could see no evidence~ of the cold and sinister state of affairs that Jean had pictured..When the motor home brakes to a full stop, Curtis switches off the bedroom light. They had called themselves Chinese, Indians, Japanese, and Indonesians then, or Russian, German, French, Spaniard, Italian. . . but now they were all simply Chironians. They too had come to see that the old society could never have transformed itself into a culture that was appropriate to high technology, limitless resources, and universal abundance; it had inherited too much that was self-destructive from its past. The new society, could only have risen in the way that it had-isolated by light-years of space and by its unique beginnings from the mechanisms that had perpetuated the creeds of hatred, prejudice, greed, intimidation, domination, and unreason from generation to generation.
