And it was the duality of universes, each exhibiting a spacetime decomposed into two discrete dimensions, which gave rise to the two-way duality manifested by tweedles and antitweedles: Dums, dees, antidums, and antidees were simply spacelike, timelike, antispacelike, and antitimelike projections of the same fundamental entity existing in the timeless, spaceless domain of tweedlespace.." Padawski and his followers had somehow shown up on the far side of the Medichironian, which was only sparsely settled, and seemed to be settling in as bandits in the hills. What a bandit would hope to achieve on a world like Chiron was hard to see, but revenge against Chironians seemed to have a lot to do with it; two isolated homes had been invaded, ransacked, and looted, in the course of which five Chironians and one soldier had been killed, Three Chironians, including a fifteen-year-old girl, had been raped. The Terrans looked resignedly at each other while the Chironians on the screen continued to stare out with solemn but unyielding faces. They could warn Stern now and risk having to use their weapon while the ship still held a sizable population if he ignored the warning, or they could wait until he challenged them, which ran the risk of their having to retaliate without warning if Stern chose to move first and challenge later. "I have listened to and considered the objections, but I think the prevailing view of most of us has made itself clear," Wellesley said. "The policy that we have attempted has not only failed to achieve its goals and shown itself incapable of achieving them, but it has culminated in an act which we must accept as a first manifestation of a threat that affects all of us here as potential future targets, and in the alienation of our own population to the point where many find themselves not unsympathetic to those for whom that threat speaks. But we reject them. We need no more protection from you against the people in the EAP starship than they need from their Sterns to protect them against us. We have no need of that kind of strength. Is it strength for neighbors to fortify their homes against each other, or is it paranoia? You must feel very insecure to wish to fortify an entire star system." Stern's mouth clamped into a grim, down turned line..CHAPTER NINETEEN.- At that moment a local alarm sounded inside the command post. Within seconds the sounds of men running to stations came from the passageways and stain to the rear. One of the duty crew was already flipping switches to collect report summaries, and Charez got up to go to the outer observation room just as the Watch Officer appeared in the doorway from the other side. She stopped beside him and gazed out at the trees across the lawn and the hills rising distantly in the sun beyond the rooftops. "It's going to be such a beautiful world," she said. "I'm not sure I can stand much more of this waiting around. Surely it has to be as good as over." .Stern was unperturbed, as if he had been expecting such an answer. "I made no mention of your wanting to save yourself physically. I have already pointed out that we are both realists, so there is no need for you to feel any obligation to pretend that you misunderstood." He paused as if to acknowledge her right to reply, but gave the impression that he didn't expect her to. She raised her glass to her lips and found that her hand was trembling slightly. Stern resumed. "The dream has crumbled away, hasn't it, Celia. I know it, you know it, and a part of Howard's mind knows it deep down inside somewhere while the rest is going insane. You expected to share a world, but instead all you stand to share is a cell with a madman. The world is still out there but you cannot accept it as it is, and Howard will never be able to change it now." Stern extended a hand expressively. "And the future awaits you." He paused again, watched as Celia lowered her eyes, and nodded. "Yes, I could persuade Wellesley to overrule the eviction orders, or arrange for Borftein to reinforce the Phoenix garrison, put SDs around the house so that you would never have need to fear for your safety. But is that what you want me to do?" "Very well," he said. "Stanislau has had his encore. Now let's get back to business..Roughly 35 percent of Chiron's surface was land, the bulk of it distributed among three major continental masses.
