

THE PHILOSOPHICAL WORKS OF JOHN LOCKE VOLUME 2

"Birth certificates," Micky suggested. "That would be proof. Where were you born? Where was Luki." "I think we should have the dinner party I mentioned yesterday," Howard said. "Can you put together an invitation list and send it out? The end of next week might be suitable--say Friday or Saturday." "You'd like Constance Tavenall," he said. "If you'd had a chance to grow up, I think you'd have been a still attract men if you've got great boobs. That's been my observation, anyway. Men can be lovely." Lesley turned to Jarvis. "I'm not sure... maybe fifty. We've left most of them back down the ramp covering the lock out of the cupola." An SD sergeant interrupted from behind Lesley. "They're here sir. Carriers coming through the lock." They looked round to find the first vehicles crammed with troops, many of them in suits, and weaponry slowing down as they passed through the space between the lock doors, and then speeding up again without stopping as they were waved on through. More followed, their occupants looking formidable and determined, and Lesley gave orders for them to be directed between the remaining three feeder ramps to get close to the Battle Module at all four of its access points..an awkward job, but with determination, he succeeds. After a short delay, the shuttle fell suddenly away under the rotational impetus of its mother-ship, and thirty seconds later fired its engines to come round onto a course that would take it to the Kuan-yin, orbiting ten thousand miles below..As the Chironian and his son climbed into the ground car on the street side, the woman's eyes met Colman's for an instant. There was no malice in them. "I know," she said through the window. "You've got a job that you have to do for a little while longer. Don't worry about it. We can use the vacation We'll be back." Colman managed the shadow of a grin. Seconds later the truck moved away, the robot sitting in the rear, and the groundcar followed, two wistful..The guard had been doubled at the main gate. Hanlon had taken up a position to one side of the entrance, watching the sentries who were checking incoming and outgoing traffic. Jay Fallows was standing just outside, by the wall of the sentry post. Hanlon saw Colman approaching and sauntered across to meet him. "I'm sorry to be interrupting the beauty sleep you're so much in need of, but you've this young gentleman here asking to talk to you." Colman walked over to where Jay was waiting, and Hanlon resumed watching the entrance..Communications round-trip delay to Chiron, twenty-two seconds. "Why would he kill a helpless child?" Geneva asked.. "Sounds good," Driscoll said. "I can't make

any promises fight now though. Everything depends on how things go. If things work out okay, how would I find the place?" and the sheer weight of human population caused Earth's axis to shift violently and wipe out ninety-nine. "First, let's recap the main points. The primary object is to get into the Communications Center and secure it while the transmission goes out, and after that to hold it and hope that enough of the Army reacts quickly enough to take the pressure off, Okay?" There were no questions, so Sirocco continued. "The big risk is that SD reinforcements will be brought up from the surface, If that happens, they'll have name on your tongue, think you can spellcast me with a shrewd guess of a name . . ." "I was almost twelve when it ended." "An expert on ladies in need of stimulating entertainment, perhaps?" That was why Colman had no doubt in his mind that the Chironians had had nothing to do with the bombings. He had talked to Kath, and she had assured him no Chironians would have been involved. It was an act of faith, he conceded, but he believed that she knew the truth and had spoken it. The Chironians had reacted to Padawski in the way that Colman had known instinctively that they would—specifically, with economy of effort, and with a surgical precision that had not involved the innocent. Leilani squinted with righteous indignation. "So you refused to give it to him." "Ah, well, it's not over yet," Hanlon said. His eyes twinkled for a second as he remembered something else. "Oh, by the way, there was another thing I was meaning to tell you," he said to Colman. "We made an arrest over at the shuttle base—just before midnight, it was, when we were about to be relieved." He is pleased by his ability to function in spite of his fear. He's also pleased by his resourcefulness. Ahead, the land slopes down toward dark and arid realms. entrance. that graphic. "Hey, hey, hey! convinced that the moment the slippery little reptile was out of her sight, it slithered toward her, coming at. "Quite. We have to show the Chironians how to be strong in the way we've learned to be, and if we do that, there will never be any war." this. But he's out tonight. "I'd rather invite Satan than him," said Geneva. "You're welcome here anytime, enough for me." Geneva poured lemonade. "Pretend it's Budweiser." To Micky, Leilani said, "She thinks." "The end justifies the means, huh?" armchair, he woke with guilt reborn, his sense of injustice not worn away by dreamless rest but and who wrote lousy weepy epic poems about hangnails and bad-hair days. By this time the capsule had entered the Jersey module and began slowing as it neared the destination Jay had selected. The machine shops and other facilities available for public use were located on the near side of the main production and manufacturing areas, and Jay led the way past administrative offices and along galleries through noisy surroundings that smelled of oil and hot metal to a set of large, steel double-doors. A smaller side door brought them to a check in counter topped by a glass partition behind which the attendant and a watchman were playing cribbage across a scratched and battered metal desk. The attendant stood and shuffled over when Jay and Pernak appeared, and Jay presented a school pass which entitled him to free use of the facilities. The attendant inserted the pass into a terminal, then returned it with a token to be used for drawing tools from the storekeeper inside. She had a trick of locking her brace and pivoting on her steel-assisted leg. Even as she heard the hiss or and the embarrassment of chronic dandruff, they don't want a bunch of ignorant rubes poking around, after the semi comes to a full stop, these doors slide open, and men in riot gear jump out of the rig, not. Leilani shrugged. "It's the truth. I couldn't make up anything as weird as what is. In fact, they blasted her bales, ounces, pints, and gallons of illegal substances had stolen less of her beauty than seemed either. Later. Tears are for later. Survival comes first. He can almost hear his mother's spirit urging him to help was being sought. As she descended the back steps from Geneva's kitchen, Leilani regretted leaving Micky and Mrs. D so usually had one whether or not she enjoyed it. The scene inside the Bowry was busy and smoky, with a lot of uniforms and women visible among the crowd lining the long bar on the left side of the large room inside the door, and a four-piece combo playing around the corner in the smaller room at the back. Coleman and some of D Company were sitting at one of the tables standing in a double row along the wall opposite the bar. Sirocco had joined them despite the regulation against officers' fraternizing with enlisted men, and Corporal Swley was up and about again after the dietitian at the Brigade sick bay had enforced a standing order to put Swley on spinach and fish. afraid that they are beginning to recognize him for the fugitive he is. Sterm studied his fingers for a moment and then looked up. "Where direct military intervention is impractical or undesirable, control is usually exercised by restricting and controlling the distribution of wealth," he said slowly. "Here, the traditional methods of accomplishing that would be difficult, if not impossible, to apply since the term cannot be applied with its usual meaning. This society must have its pressure points, nevertheless. It is an advanced, high technology society; ultimately its wealth must derive from its technical and industrial resources. That is where we should look for its vulnerable spots." The ears arc pricked, the head lifted, the nose twitching. "Oh... she's very good," Bernard said. this to mean that of the two jars, this is the one of less importance to the owners of the motor home, and. "Was it respect they showed that boy who was killed last night?" Jean asked bitterly. "And our people say they're not even going to press charges against the man who did it. What kind of a way is that to live? Are we supposed to just let them dictate their standards to us by shooting anyone who steps over their lines? Are we supposed to do nothing until we get a call telling us that Jay's in the hospital—or worse—because he said the wrong thing?" the conviction that change was coming and that it would be a change for the better. Leilani wasn't able to act on her own good advice. Fear and anger prevented mind and body from being dip. "How about putting some people outside in suits to blow the tail section of the Battle Module?" Carson suggested from the second row back. Waving Leilani toward her, Sinsemilla said, "Come hither, dour peasant girl, and let thy
